

TECHNICAL SHEET

PERKEO CU TIP 350 g

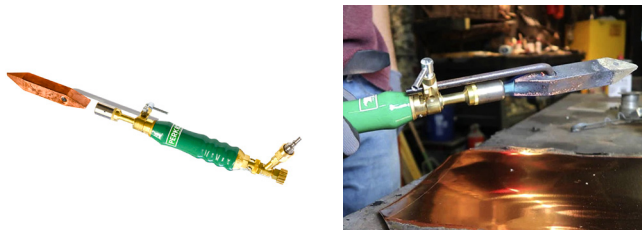

KNS-PERKE CU SPIC

DESCRIPTION:

- PERKEO soldering copper tip weighing 350g with marking 209/2
- made of cold-rolled electrolytic copper
- long service life thanks to high compressed copper
- due to the use of cold-rolled electrolytic copper as the basic material, the Soldering tips have high thermal conductive and storage capacity
- due to that the tip is heated to working temperature in less than 45 seconds
- the basic material ensures maximum heat accumulation, which also means less gas consumption during electricity

APPLICATION:

M Copper
