

TECHNICAL SHEET

PVC PLASTIC-COATED PLATE

BAU S-PVC VBL 12 PS

The Bauder sheet with PVC coating is a galvanized and synthetically coated steel sheet, designed as a complement to BauderTHERMOFOL single-ply system.

One side of the product is laminated with a 0.60 mm thick layer of Thermofol PVC, which is used for creating flashings and details.

PS Color : Galvanized steel – Natur
PVC foil: Dusty grey – RAL 7037

Technical parameter	
Size	1 x 2 m
Steel sheet thickness	0,60 mm
Plastic coating thickness	0,60 mm
Zinc coating	275 g/m ²
Top layer	PVC-P coated, dusty grey RAL 7037
Bottom layer	painted
Weight per unit area	5,0 kg/m ²
