**EASY ASSEMBLY WITHOUT
COMPROMISING THE LOOK
OR FUNCTIONALITY**

ADVANTAGES AT A GLANCE

- **Universal usability** – one type for all types of KJG sheet metal roofing
- **Self-supporting labyrinth ventilation opening** – an innovative solution for reliable and permanent ventilation
- **Removable cover** – simplifies access and maintenance when necessary
- **Large ventilation cross-section of 300 cm²** – ensures optimal air circulation in the roof ridge
- **Covering length 1,220 mm** – ideal for effective ridge coverage without gaps
- **Material thickness 1 mm** – made of high-quality aluminium for long life time and stability
- **Practical joining system** – thanks to grooves, the ridge cappings can be joined quickly and precisely without the need for further adjustments
